Delivery Time Frame: 15 business days from order

Canadian Compounding Status: Fully operational, no degradation of capacity

International Logistics: UPS is operating on time with no international shipping delays

Australian Domestic Operations: Fully operational

15-20% Reduction in Sublingual Immunotherapy (SLIT) Price to Support Patients and Practices

In light of financial challenges faced by practices and patients due to COVID-19, Gamma Allergy have decided to significantly discount their sublingual immunotherapy (SLIT) products by between 15-20% for the months of May and June 2020.

Patients Currently Receiving Gamma Allergy Subcutaneous Immunotherapy (SCIT) Injections

Any current SCIT patient that wishes to transition to SLIT will be given a 15% discount on their treatment. For concerned patients, this will provide an alternative to coming in for injections and will enable a simple switch to telehealth appointments to maintain regular contact between the practice and patient.

New Patients Commencing Treatment

For new patients starting treatment, the initial weekly injection regime has proven challenging and in some cases, impossible with social distancing measures. To ensure commencement of treatment is not delayed, any new patient starting on SLIT will receive 20% off their initial immunotherapy set.

New Patients Currently Receiving Immunotherapy Injections From Other Providers

For patients changing suppliers we can provide guidance on transfer protocols related to their current treatment plan and will discount the price of Gamma Allergy immunotherapy by 20%.

As an organisation we understand the challenges faced by the industry and feel it is important to do our part to help our physicians and their patients.

For further information on transfer protocols from SCIT to SLIT (from other suppliers or existing Gamma SCIT patients) and details on how to access these incentives, please contact us directly and a member of our team will walk you through the process.

We are here to help and if you have questions or concerns please do not hesitate to contact us.
