

ASCIA has facilitated the Transplantation and Primary Immunodeficiency (TAPID) expert collaboration since 2013, between clinical immunologists (ASCIA members), transplant physicians and international experts.

The TAPID collaboration enables complex PID and transplantation cases to be discussed in a confidential expert forum. This case discussion form must be completed for each deidentified case to be discussed.

For further information about TAPID go to www.allergy.org.au/about-ascia/ascia-initiatives/tapid

Date: _____

Centre: _____

Form completed by: _____

Patient Initials: _____

Patient DOB: _____ Age: _____
