The ASCIA TAPID (Transplantation and PID) project is an important and ongoing collaboration between clinical immunologists, transplant physicians and international PID experts, facilitated by ASCIA.

The main objective of the TAPID project is to have regular collaborations and discussions between immunologists and transplant physicians in major centres that transplant patients with PIDs in Australasia. TAPID meetings enable complex PID and transplantation cases to be discussed in a confidential expert forum.

This meeting is being held immediately prior to the 5th ASCIA PID (APID) training meeting on 26th to 30th May 2019. There is no registration fee for these meetings due to the support received via an unrestricted educational grants from **CSL Behring**.

At the ASCIA PID (APID) Consultants Meeting in May 2013, the concept of the TAPID (Transplantation and PID) project was proposed and initiated. Since then:

- TAPID face to face meetings have been held in February 2014, May 2017 and May 2018.
- The TAPID project membership has increased from 12 to more than 90 members.
- TAPID teleconferences are held each month.

The TAPID project has been supported by unrestricted educational grants from **CSL Behring**.

Current TAPID members are listed on the ASCIA website:
